SLM how to reboot July 20, 2020

How to reboot the 2245 sound level meter, should it become un-responsive

If you, during test and development, experience that the SLM becomes un-responsive, then you may have to reboot it, as described below:

- 1. Remove all external connections from the SLM, including charger and docking station.
- 2. Press and hold the center button until the SLM reboots (approximately 40 seconds).
- 3. Make sure to release the button as soon as the SLM shuts down.
- 4. Wait for the SLM to start up again.
